

Q1. Node.js is:

- A. A programming language
- B. A JavaScript runtime environment
- C. A database
- D. A framework

✅ **Answer:** B

 Explanation:

Node.js is a **runtime environment** that allows JavaScript to run **outside the browser** using the **V8 engine**. It is not a language or database.

Q2. Which engine is used by Node.js to execute JavaScript?

- A. SpiderMonkey
- B. Chakra
- C. V8
- D. Nashorn

✅ **Answer:** C

 Explanation:

Node.js uses **Google's V8 engine**, which compiles JavaScript into machine code for fast execution.

Q3. Node.js follows which architecture?

- A. Multi-threaded blocking
- B. Single-threaded blocking
- C. Multi-threaded non-blocking
- D. Single-threaded non-blocking

✅ **Answer:** D

 Explanation:

Node.js uses a **single-threaded, non-blocking, event-driven architecture**, making it highly efficient for I/O operations.

Q4. Which module is used to create a server in Node.js?

- A. fs
- B. http
- C. url
- D. path

✅ **Answer:** B

 Explanation:

The **http module** is used to create HTTP servers and handle requests and responses.

Q5. Which command is used to initialize a Node.js project?

- A. node start
- B. npm install
- C. npm init
- D. node init

✓ **Answer:** C

Explanation:

npm init creates a **package.json** file which stores project metadata and dependencies.

● EXPRESS.JS – MCQs

Q6. Express.js is:

- A. A frontend framework
- B. A database
- C. A Node.js web framework
- D. A compiler

✓ **Answer:** C

Explanation:

Express.js is a **minimal and flexible web framework** built on Node.js to create APIs and web applications.

Q7. Which method is used to handle GET requests in Express?

- A. app.post()
- B. app.put()
- C. app.get()
- D. app.delete()

✓ **Answer:** C

Explanation:

app.get() handles HTTP **GET** requests.

Q8. What is middleware in Express.js?

- A. Database
- B. Function that executes between request and response
- C. Route
- D. Server

✓ **Answer:** B

**Explanation:**

Middleware functions have access to **req, res, and next** and are used for logging, authentication, parsing, etc.

Q9. Which middleware is used to parse JSON data?

- A. body-parser
- B. express.json()
- C. multer
- D. cookie-parser

Answer: B

**Explanation:**

express.json() parses incoming JSON request bodies.

Q10. Which command is used to install Express?

- A. npm express
- B. node install express
- C. npm install express
- D. express install

Answer: C

**MONGODB – MCQs**

Q11. MongoDB is a:

- A. Relational database
- B. NoSQL database
- C. Graph database
- D. Key-value store

Answer: B

**Explanation:**

MongoDB is a **NoSQL, document-oriented database**.

Q12. Data in MongoDB is stored in:

- A. Rows
- B. Tables
- C. Documents
- D. Columns

Answer: C

Q13. MongoDB documents are stored in:

- A. Tables
- B. Collections
- C. Schemas
- D. Fields

✓ **Answer: B**

Q14. Which command is used to show databases?

- A. show db
- B. show database
- C. show dbs
- D. display db

✓ **Answer: C**

Q15. Default port of MongoDB is:

- A. 3000
- B. 8080
- C. 27017
- D. 5000

✓ **Answer: C**

◆ **SECTION 2: SHORT ANSWER QUESTIONS (with Detailed Answers)**

Q1. What is Node.js?

Answer:

Node.js is an **open-source JavaScript runtime environment** that allows developers to run JavaScript on the server side. It uses **non-blocking I/O** and an **event-driven architecture** for high performance.

Q2. What is npm?

Answer:

npm (Node Package Manager) is used to **install, manage, and share Node.js packages**. It uses package.json to track dependencies.

Q3. What is Express.js?

Answer:

Express.js is a **fast, unopinionated web framework** for Node.js used to build **REST APIs and web applications** easily.

Q4. Explain middleware in Express.js.

Answer:

Middleware functions are functions that run **between the request and response cycle**.

They can:

- Modify request/response
- Perform authentication
- Handle errors

Example:

```
app.use((req, res, next) => {  
  console.log("Middleware executed");  
  next();  
});
```

Q5. What is MongoDB?

Answer:

MongoDB is a **NoSQL document-based database** that stores data in **JSON-like format (BSON)** and provides high scalability and flexibility.

Q6. Difference between SQL and MongoDB.

Answer:

SQL	MongoDB
Relational DB	NoSQL DB
Tables & Rows	Collections & Documents
Fixed schema	Flexible schema

Q7. What is REST API?

Answer:

REST API follows **HTTP methods** like GET, POST, PUT, DELETE to perform CRUD operations between client and server.

Q8. What is package.json?

Answer:

package.json stores:

- Project details
 - Dependencies
 - Scripts
 - Version info
-

Q9. What is CRUD?

Answer:

CRUD stands for:

- **Create**
- **Read**
- **Update**
- **Delete**

These are basic database operations.

Q10. What is Mongoose?

Answer:

Mongoose is an **ODM (Object Data Modeling) library** for MongoDB and Node.js that provides **schema-based structure**.

Q1. Which statement is TRUE about Node.js?

- A. It supports only synchronous operations
- B. It is multi-threaded by default
- C. It is event-driven and non-blocking
- D. It cannot handle multiple requests

✓ **Answer: C**

 **Explanation:**

Node.js handles multiple requests efficiently using **event-driven, non-blocking I/O**, even though it is single-threaded.

Q2. Which of the following is a core module in Node.js?

- A. express
- B. mongoose
- C. fs
- D. axios

✓ **Answer: C**

 **Explanation:**

fs (File System) is a **built-in Node.js module**. Others are external packages.

Q3. Which method is used to read a file asynchronously?

- A. fs.readFileSync()
- B. fs.read()
- C. fs.readFile()
- D. fs.open()

✓ **Answer: C**

Q4. What does require() do in Node.js?

- A. Imports a module
- B. Exports a module
- C. Deletes a module
- D. Executes npm

✓ **Answer: A**

Q5. Which object is used to handle events in Node.js?

- A. EventLoop
- B. EventEmitter
- C. EventHandler
- D. EventObject

✓ Answer: B

● EXPRESS.JS – MCQs

Q6. Which function is used to create an Express application?

- A. new express()
- B. express.create()
- C. express()
- D. app()

✓ Answer: C

Q7. What does res.send() do?

- A. Receives data
- B. Sends response to client
- C. Stops server
- D. Parses request

✓ Answer: B

Q8. Which HTTP status code means “Not Found”?

- A. 200
- B. 301
- C. 400
- D. 404

✓ Answer: D

Q9. Which middleware handles URL-encoded data?

- A. express.json()
- B. express.urlencoded()
- C. cookie-parser
- D. multer

✓ Answer: B

Q10. Which Express method is used for error handling?

- A. app.error()
- B. app.use()
- C. app.handleError()
- D. app.catch()

✓ **Answer: B**

Explanation:

Error-handling middleware uses `app.use((err, req, res, next) => {})`.

● MONGODB – MCQs

Q11. Which command creates a new database?

- A. create db
- B. use databaseName
- C. new db
- D. make db

✓ **Answer: B**

Q12. Which MongoDB method is used to insert a document?

- A. insert()
- B. insertOne()
- C. add()
- D. create()

✓ **Answer: B**

Q13. _id field in MongoDB is:

- A. Optional
- B. Mandatory
- C. Can be duplicated
- D. Always null

✓ **Answer: B**

Q14. Which data format is used by MongoDB?

- A. XML
- B. JSON
- C. BSON
- D. CSV

✓ **Answer: C**

Q15. Which command removes all documents from a collection?

- A. delete()
- B. deleteMany({})
- C. removeOne()
- D. dropDatabase()

✅ **Answer: B**

◆ **SECTION 2: MORE SHORT ANSWER QUESTIONS (Detailed)**

Q1. Explain Event Loop in Node.js.

Answer:

The **Event Loop** allows Node.js to perform **non-blocking operations** by offloading tasks and executing callbacks once operations complete. It handles:

- Timers
 - I/O callbacks
 - Promises
-

Q2. What is callback function?

Answer:

A callback is a **function passed as an argument** to another function and executed after the completion of an operation.

Q3. What is blocking vs non-blocking I/O?

Answer:

Blocking	Non-blocking
Waits for task completion	Continues execution
Slower	Faster
Uses sync methods	Uses async methods

Q4. What is routing in Express.js?

Answer:

Routing refers to defining **URLs and HTTP methods** to handle client requests.

Example:

```
app.get('/users', (req, res) => {  
  res.send("Users list");  
});
```

Q5. What is next() in Express?

Answer:

next() passes control to the **next middleware function** in the request-response cycle.

Q6. What is NoSQL?

Answer:

NoSQL databases store data in **non-tabular formats** and provide **high scalability and flexible schema**.

Q7. What is indexing in MongoDB?

Answer:

Indexing improves **query performance** by reducing data scanning time.

Q8. What is aggregation in MongoDB?

Answer:

Aggregation processes data and returns computed results like sum, average, count.

Q9. Difference between find() and findOne().

Answer:

find()	findOne()
Returns multiple documents	Returns single document
Cursor	Object

Q10. What is environment variable?

Answer:

Environment variables store **sensitive data** like API keys and database URLs.

NODE.JS (1–35)

1. **What is Node.js?**
👉 JavaScript runtime environment
2. **Node.js is built on which engine?**
👉 V8 JavaScript Engine
3. **Node.js is single-threaded or multi-threaded?**
👉 Single-threaded
4. **Node.js supports which type of I/O?**
👉 Non-blocking I/O
5. **Which architecture does Node.js follow?**
👉 Event-driven architecture
6. **Which module is used to create a server?**
👉 http
7. **Which module handles file operations?**
👉 fs
8. **Which command initializes Node project?**
👉 npm init
9. **Which file stores project dependencies?**
👉 package.json
10. **What is npm?**
👉 Node Package Manager
11. **Which keyword imports a module?**
👉 require()
12. **Which keyword exports a module?**
👉 module.exports
13. **Which object handles events?**
👉 EventEmitter
14. **What is callback?**
👉 Function passed as argument
15. **Which method reads file asynchronously?**
👉 fs.readFile()
16. **Which method reads file synchronously?**
👉 fs.readFileSync()
17. **What is Event Loop?**
👉 Handles async operations

18. **Node.js default port?**
 - 👉 No default port
19. **Which command runs a JS file?**
 - 👉 node filename.js
20. **Which object represents request?**
 - 👉 req
21. **Which object represents response?**
 - 👉 res
22. **Node.js is best suited for?**
 - 👉 I/O intensive apps
23. **Which protocol does Node server use?**
 - 👉 HTTP
24. **What is Buffer?**
 - 👉 Temporary memory storage
25. **What is stream?**
 - 👉 Data flow in chunks
26. **Node.js file extension?**
 - 👉 .js
27. **What is blocking code?**
 - 👉 Stops execution
28. **What is non-blocking code?**
 - 👉 Executes asynchronously
29. **Which global object handles paths?**
 - 👉 path
30. **Which command installs dependency?**
 - 👉 npm install
31. **Which file locks dependencies?**
 - 👉 package-lock.json
32. **Node.js written in which language?**
 - 👉 C++
33. **Which method creates server?**
 - 👉 http.createServer()
34. **What is REPL?**
 - 👉 Read Eval Print Loop
35. **Node.js is used for frontend or backend?**
 - 👉 Backend

● EXPRESS.JS (36–70)

36. What is Express.js?

👉 Node.js framework

37. Express.js is used to build?

👉 Web apps & APIs

38. Which function creates Express app?

👉 `express()`

39. Which method handles GET request?

👉 `app.get()`

40. Which method handles POST request?

👉 `app.post()`

41. Which method handles PUT request?

👉 `app.put()`

42. Which method handles DELETE request?

👉 `app.delete()`

43. What is middleware?

👉 Function between req & res

44. Which middleware parses JSON?

👉 `express.json()`

45. Which middleware parses form data?

👉 `express.urlencoded()`

46. What does `next()` do?

👉 Moves to next middleware

47. Which method sends response?

👉 `res.send()`

48. Which method sends JSON?

👉 `res.json()`

49. Which method sets status code?

👉 `res.status()`

50. Which HTTP code means success?

👉 200

51. Which HTTP code means not found?

👉 404

52. Which HTTP code means server error?

👉 500

53. Which port is commonly used by Express?

👉 3000

54. How to start Express server?

👉 `app.listen()`

55. What is routing?

👉 URL handling

56. Which object holds URL params?

👉 `req.params`

57. Which object holds query string?

👉 `req.query`

58. Which object holds body data?

👉 `req.body`

59. What is REST API?

👉 Stateless web service

60. REST uses which methods?

👉 GET, POST, PUT, DELETE

61. Express is synchronous or async?

👉 Async

62. What is error middleware?

👉 Handles errors

63. Middleware execution order?

👉 Top to bottom

64. Which method serves static files?

👉 `express.static()`

65. Which command installs Express?

👉 `npm install express`

66. Express is opinionated?

👉 No

67. What is MVC?

👉 Model View Controller

68. Express follows MVC?

👉 Yes (optional)

69. Which file starts Express app?

👉 `index.js` / `app.js`

70. Express is built on?

👉 Node.js

● MONGODB (71–100)

- 71. **What is MongoDB?**
 - 👉 NoSQL database
- 72. **MongoDB stores data in?**
 - 👉 Documents
- 73. **Documents are stored in?**
 - 👉 Collections
- 74. **MongoDB data format?**
 - 👉 BSON
- 75. **MongoDB default port?**
 - 👉 27017
- 76. **Which command shows databases?**
 - 👉 show dbs
- 77. **Which command selects database?**
 - 👉 use dbName
- 78. **Which command shows collections?**
 - 👉 show collections
- 79. **Which command inserts one document?**
 - 👉 insertOne()
- 80. **Which command inserts many documents?**
 - 👉 insertMany()
- 81. **Which command finds documents?**
 - 👉 find()
- 82. **Which command finds one document?**
 - 👉 findOne()
- 83. **Which command updates document?**
 - 👉 updateOne()
- 84. **Which command deletes document?**
 - 👉 deleteOne()
- 85. **Which command deletes many docs?**
 - 👉 deleteMany()
- 86. **What is _id?**
 - 👉 Unique identifier
- 87. **_id is mandatory?**
 - 👉 Yes

88. **MongoDB schema is fixed?**

👉 No

89. **What is indexing?**

👉 Improves query speed

90. **What is aggregation?**

👉 Data processing

91. **MongoDB is relational?**

👉 No

92. **What is Mongoose?**

👉 ODM library

93. **ODM stands for?**

👉 Object Data Modeling

94. **Which method connects MongoDB?**

👉 `mongoose.connect()`

95. **Which command drops database?**

👉 `db.dropDatabase()`

96. **Which command removes collection?**

👉 `drop()`

97. **MongoDB supports joins?**

👉 Limited (\$lookup)

98. **MongoDB is scalable?**

👉 Yes

99. **MongoDB supports replication?**

👉 Yes

100. **MongoDB is best for?**

👉 Big & flexible data

NODE.JS (1–40)

1. Node.js is a
 - A) Programming language
 - B) Framework
 - C) Runtime environment
 - D) Database

👉 **Ans: C**
2. Node.js runs on which engine?
 - A) Chakra
 - B) SpiderMonkey
 - C) V8
 - D) Nashorn

👉 **Ans: C**
3. Node.js is
 - A) Multi-threaded
 - B) Single-threaded
 - C) Threadless
 - D) Dual-threaded

👉 **Ans: B**
4. Node.js uses which architecture?
 - A) MVC
 - B) Client-server
 - C) Event-driven
 - D) Layered

👉 **Ans: C**
5. Which module creates server in Node.js?
 - A) fs
 - B) http
 - C) url
 - D) net

👉 **Ans: B**
6. Which module handles file system?
 - A) os
 - B) path
 - C) fs
 - D) util

👉 **Ans: C**
7. Which command starts Node app?
 - A) npm start
 - B) node app.js
 - C) run node
 - D) start node

👉 **Ans: B**

8. Which file stores dependencies?

- A) index.js
- B) server.js
- C) package.json
- D) config.js

👉 **Ans: C**

9. npm stands for

- A) Node Project Manager
- B) Node Package Manager
- C) New Package Manager
- D) Network Package Manager

👉 **Ans: B**

10. Which method imports module?

- A) import
- B) require()
- C) include()
- D) load()

👉 **Ans: B**

11. Which exports module?

- A) module.export
- B) exports()
- C) module.exports
- D) export()

👉 **Ans: C**

12. Node.js supports

- A) Blocking I/O
- B) Non-blocking I/O
- C) Only sync I/O
- D) No I/O

👉 **Ans: B**

13. Which is a core module?

- A) express
- B) mongoose
- C) fs
- D) axios

👉 **Ans: C**

14. Callback is

- A) Function call
- B) Async keyword
- C) Function passed as argument
- D) Promise

👉 **Ans: C**

15. Which handles async tasks?

- A) Thread
- B) Event Loop
- C) Worker
- D) Timer

👉 **Ans: B**

16. Which reads file asynchronously?

- A) readSync
- B) fs.read()
- C) fs.readFile()
- D) openFile()

👉 **Ans: C**

17. Which reads file synchronously?

- A) fs.readFile()
- B) fs.readFileSync()
- C) fs.open()
- D) fs.read()

👉 **Ans: B**

18. Node.js default port is

- A) 3000
- B) 8080
- C) None
- D) 27017

👉 **Ans: C**

19. REPL stands for

- A) Run Eval Print Loop
- B) Read Eval Print Loop
- C) Read Execute Print Loop
- D) Run Execute Print Loop

👉 **Ans: B**

20. Node.js is mainly used for

- A) Frontend
- B) Backend
- C) Database
- D) Design

👉 **Ans: B**

21. Which object represents request?

- A) request
- B) response
- C) req
- D) res

👉 **Ans: C**

22. Which object represents response?

- A) req
- B) res
- C) response
- D) result

👉 **Ans: B**

23. Which command installs package?

- A) npm add
- B) npm get
- C) npm install
- D) npm load

👉 **Ans: C**

24. package-lock.json is used for

- A) Version locking
- B) Scripts
- C) Server
- D) DB config

👉 **Ans: A**

25. Node.js written in

- A) Java
- B) Python
- C) C++
- D) Ruby

👉 **Ans: C**

26. Which module handles paths?

- A) fs
- B) os
- C) path
- D) url

👉 **Ans: C**

27. Which object handles events?

- A) EventHandler
- B) EventEmitter
- C) EventLoop
- D) EventManager

👉 **Ans: B**

28. Blocking code means

- A) Async execution
- B) Stops execution
- C) Faster code
- D) Parallel code

👉 **Ans: B**

29. Non-blocking code means

- A) Stops execution
- B) Sync code
- C) Async execution
- D) Error

👉 **Ans: C**

30. Which is NOT Node feature?

- A) Fast execution
- B) Non-blocking
- C) Event-driven
- D) Multithreading

👉 **Ans: D**

31. Node.js uses

- A) JVM
- B) CLR
- C) V8
- D) JRE

👉 **Ans: C**

32. Which protocol Node server uses?

- A) FTP
- B) HTTP
- C) SMTP
- D) TCP only

👉 **Ans: B**

33. Buffer is used for

- A) Storage
- B) Temporary memory
- C) Database
- D) Cache server

👉 **Ans: B**

34. Streams process data in

- A) Bulk
- B) Chunks
- C) Rows
- D) Blocks

👉 **Ans: B**

35. Node.js extension is

- A) .node
- B) .json
- C) .js
- D) .ts

👉 **Ans: C**

36. Which command checks Node version?

- A) node -v
- B) node --start
- C) npm -v
- D) node version

👉 **Ans: A**

37. Which command checks npm version?

- A) node -v
- B) npm -v
- C) npm start
- D) node npm

👉 **Ans: B**

38. Which module handles OS info?

- A) fs
- B) os
- C) path
- D) util

👉 **Ans: B**

39. Node.js best for

- A) CPU intensive
- B) I/O intensive
- C) Design
- D) ML

👉 **Ans: B**

40. Node.js is

- A) Synchronous
- B) Asynchronous
- C) Blocking
- D) Sequential

👉 **Ans: B**

● EXPRESS.JS (41–70)

41. Express.js is

- A) Database
- B) Framework
- C) Language
- D) Compiler

👉 **Ans: B**

42. Express is built on

- A) React
- B) MongoDB
- C) Node.js

D) Angular

👉 **Ans: C**

43. Which creates Express app?

A) express.create()

B) new express()

C) express()

D) app()

👉 **Ans: C**

44. Which handles GET request?

A) app.post()

B) app.put()

C) app.get()

D) app.fetch()

👉 **Ans: C**

45. Which handles POST request?

A) app.send()

B) app.post()

C) app.add()

D) app.push()

👉 **Ans: B**

46. Which sends response?

A) res.send()

B) req.send()

C) app.send()

D) send()

👉 **Ans: A**

47. Middleware is

A) DB

B) Route

C) Function

D) Server

👉 **Ans: C**

48. Middleware executes

A) Before request

B) After response

C) Between req & res

D) Only once

👉 **Ans: C**

49. Which parses JSON body?

A) bodyParser

B) express.json()

C) jsonParser

D) multer

👉 **Ans: B**

50. Which parses form data?

A) `express.urlencoded()`

B) `express.json()`

C) multer

D) cookie

👉 **Ans: A**

51. `next()` is used to

A) Stop server

B) Call next middleware

C) Send response

D) Parse request

👉 **Ans: B**

52. `req.params` contains

A) Query

B) Body

C) URL params

D) Headers

👉 **Ans: C**

53. `req.query` contains

A) Params

B) Query string

C) Body

D) Headers

👉 **Ans: B**

54. `req.body` contains

A) Params

B) Body data

C) Query

D) URL

👉 **Ans: B**

55. Which sets status code?

A) `res.code()`

B) `res.send()`

C) `res.status()`

D) `app.status()`

👉 **Ans: C**

56. HTTP 200 means

A) Error

B) Not found

C) Success

D) Forbidden

👉 **Ans: C**

57. HTTP 404 means

- A) Success
- B) Server error
- C) Not found
- D) Unauthorized

👉 **Ans: C**

58. HTTP 500 means

- A) Success
- B) Client error
- C) Server error
- D) Redirect

👉 **Ans: C**

59. Express default port

- A) 8080
- B) 5000
- C) 3000
- D) 27017

👉 **Ans: C**

60. app.listen() is used to

- A) Stop server
- B) Start server
- C) Restart server
- D) Create DB

👉 **Ans: B**

61. Routing means

- A) DB connection
- B) URL handling
- C) Middleware
- D) Response

👉 **Ans: B**

62. REST stands for

- A) Remote State Transfer
- B) Representational State Transfer
- C) Response State Transfer
- D) Resource State Transfer

👉 **Ans: B**

63. REST API is

- A) Stateful
- B) Stateless
- C) Session based

D) Server side

👉 **Ans: B**

64. Which serves static files?

A) `express.static()`

B) `app.static()`

C) `static()`

D) `serve()`

👉 **Ans: A**

65. Express installation command

A) `npm express`

B) `npm install express`

C) `node express`

D) `install express`

👉 **Ans: B**

66. Express is

A) Opinionated

B) Unopinionated

C) Strict

D) Heavy

👉 **Ans: B**

67. Error middleware has parameters

A) `req, res`

B) `err, req, res, next`

C) `err, res`

D) `req, err`

👉 **Ans: B**

68. Express follows

A) MVC only

B) MVVM

C) Optional MVC

D) None

👉 **Ans: C**

69. Which file starts server usually?

A) `index.js`

B) `app.json`

C) `server.html`

D) `main.css`

👉 **Ans: A**

70. Express used for

A) Frontend

B) APIs

C) Database

D) Styling

👉 **Ans: B**

● **MONGODB (71–100)**

71. MongoDB is

- A) SQL DB
- B) NoSQL DB
- C) Graph DB
- D) File DB

👉 **Ans: B**

72. MongoDB stores data as

- A) Rows
- B) Tables
- C) Documents
- D) Columns

👉 **Ans: C**

73. Documents stored in

- A) Tables
- B) Schemas
- C) Collections
- D) Rows

👉 **Ans: C**

74. MongoDB data format

- A) JSON
- B) XML
- C) BSON
- D) CSV

👉 **Ans: C**

75. MongoDB default port

- A) 3000
- B) 8080
- C) 27017
- D) 3306

👉 **Ans: C**

76. show dbs command shows

- A) Tables
- B) Databases
- C) Collections
- D) Users

👉 **Ans: B**

77. use dbName command

- A) Deletes DB

- B) Selects DB
- C) Creates table
- D) Shows DB

👉 **Ans: B**

78. show collections shows

- A) DBs
- B) Docs
- C) Collections
- D) Tables

👉 **Ans: C**

79. Insert one document

- A) insert()
- B) insertOne()
- C) add()
- D) create()

👉 **Ans: B**

80. Insert many documents

- A) insertMany()
- B) insertAll()
- C) addMany()
- D) createMany()

👉 **Ans: A**

81. Find all documents

- A) findOne()
- B) find()
- C) search()
- D) select()

👉 **Ans: B**

82. Find single document

- A) find()
- B) findFirst()
- C) findOne()
- D) getOne()

👉 **Ans: C**

83. Update one document

- A) update()
- B) updateOne()
- C) modify()
- D) set()

👉 **Ans: B**

84. Delete one document

- A) delete()
- B) deleteOne()

C) remove()

D) drop()

👉 **Ans: B**

85. Delete many documents

A) deleteMany()

B) removeAll()

C) dropMany()

D) clear()

👉 **Ans: A**

86. _id field is

A) Optional

B) Mandatory

C) Nullable

D) Duplicate

👉 **Ans: B**

87. MongoDB schema is

A) Fixed

B) Flexible

C) Mandatory

D) Strict

👉 **Ans: B**

88. Indexing improves

A) Storage

B) Speed

C) Size

D) Security

👉 **Ans: B**

89. Aggregation is used for

A) Insert

B) Update

C) Data processing

D) Delete

👉 **Ans: C**

90. MongoDB supports joins using

A) join()

B) merge()

C) \$lookup

D) relate()

👉 **Ans: C**

91. MongoDB is

A) Relational

B) Non-relational

C) Flat DB

D) File DB

👉 **Ans: B**

92. Mongoose is

A) DB

B) Framework

C) ODM

D) ORM

👉 **Ans: C**

93. ODM stands for

A) Object Data Model

B) Object Data Mapping

C) Object Data Modeling

D) Object Database Model

👉 **Ans: C**

94. Connect MongoDB using

A) connect()

B) mongoose.connect()

C) mongo.connect()

D) db.connect()

👉 **Ans: B**

95. Drop database command

A) deleteDB()

B) dropDB()

C) db.dropDatabase()

D) removeDB()

👉 **Ans: C**

96. Drop collection command

A) delete()

B) remove()

C) drop()

D) clear()

👉 **Ans: C**

97. MongoDB supports replication

A) Yes

B) No

C) Partial

D) Limited

👉 **Ans: A**

98. MongoDB supports sharding

A) Yes

B) No

C) Optional

D) Manual

👉 **Ans: A**

99. MongoDB best for

A) Small data

B) Fixed schema

C) Big data

D) Static data

👉 **Ans: C**

100. MongoDB is scalable

A) No

B) Vertically only

C) Horizontally

D) Not scalable

👉 **Ans: C**
